

RSP Training Courses 2016

Basic introduction. Operating. Customized training programs.

Service

We make you fit.

Would you like to get hands-on practice operating a suction excavator? No matter whether you already have machine-related experience or not – we as the manufacturer offer thematic courses for you as the practitioner.

Our tailored training modules combine theory and practice. Participants get real-world experience with operating, maintaining and repairing the machine as well as an introduction to its technical side.

Make your choice.

After having successfully completed the course, each participant will be awarded a certificate to show that he possesses the skills and knowledge necessary to perform all of the daily operations tasks, as well as the ability to spot potential problems.

Choose from among three training languages: German, English, French.

Your benefits.

- Full use of the installed machine power
- Prevention of erroneous settings
- Inexperienced drivers are taught vehicle handling
- Advantages over your competitors
- Time and money savings

Module A0.

Professionally qualified RSP technicians give insights into the world of suction excavators. Our experts are thoroughly familiar with the product and therefore able to answer even the most specific questions. Participants learn how to unleash the full potential of your machine and its accessories and how to stay safe while operating them at construction sites.

Your benefits.

- 2-day seminar: thematic familiarization
- Real-world practical experience with the suction excavator
- Solution-focused discussions on machine handling
- Answers to specific technical questions

Target group.

Novice operators, operators, workshop staff

Number of participants.

min. 5 persons, max. 12 persons

Date training center in Saalfeld.

by arrangement

Costs per participant **590,00 EUR***

Module A1.

In addition to giving the student a general understanding of the operating principle of a suction excavator, module A 1 aims to impart fundamental knowledge on how the machine's hydraulic, pneumatic and electrical system work. This module includes comprehensive instructions for using the radio remote control and practical hints on how to operate the suction excavator and its pneumatic accessories in an efficient and safe manner.

Your benefits.

- 3-day course: professional on-the-job training
- Theoretical knowledge on how the hydraulic, pneumatic and electrical systems work
- Practical, real-world experience with the suction excavator
- Correct use of the accessories

Target group.

Operators, workshop employees

Number of participants.

min. 5 persons, max. 12 persons

Dates training center in Saalfeld.

15.02. – 17.02.16

20.06. – 22.06.16

17.10. – 19.10.16

Costs per participant **1150,00 EUR***

Module C1.

Our customized Module C1 is absolutely flexible and individually built around you, from your knowledge level, your fields of operation to your suction excavator model.

Topics can also include operating a suction excavator, troubleshooting, economic operation, safety as well as service and maintenance.

All training courses can also be held in your national language. We would be happy to speak with you in a face-to-face meeting to find a specific training program that suits your specific needs.

Your benefits.

- 3-day course: professional on-the-job training
- Hands-on practice with the suction excavator
- Correct use of the accessories & operation under professional guidance
- Customer-specific training

Target group.

Operators, workshop staff, service technicians

Number of participants.

min. 5 persons, max. 7 persons

Training dates.
